The scope of our research includes:

- Anesthesia/Pain
- Ear, nose & throat
- Eating disorders
- Emergency medicine
- Healthy aging
- Hematology/Oncology
- Mental Health
- Nephrology
- Obstetrics & Gynecology
- Orthopedics
- Surgery

In 2019/20 our researchers received $61 million in funding from federal and provincial agencies, the St. Paul's Foundation and industry partners.

We have more than 240 principal investigators, many of whom are also clinicians. 11 are Canada Research Chairs, recognized as world leaders in their fields.

In 2019/20 we initiated 275 new research studies and we have 1000+ active studies underway.

We have a number of outstanding clinical research programs investigating disorders related to:

- Anesthesia/Pain
- Ear, nose & throat
- Eating disorders
- Emergency medicine
- Healthy aging
- Hematology/Oncology
- Mental Health
- Nephrology
- Obstetrics & Gynecology
- Orthopedics
- Surgery

In 2019, the federal government invested $23 million to support the CIHR Canadian HIV Trials Network, headquartered at St. Paul’s Hospital.
